Expedition: Sagittarius Mission Report

Goal- Follow up on Hypothesis' made by Chief Scientist [REDACTED] about [REDACTED]
[REDACTED] of an extragalactic cosmic flares

Hypothesis- The Extragalactic flare observed on March 17, 1992 could possibly [REDACTED]
[REDACTED] Should cosmic flares go stronger and affect life on earth, preparation
will be impossible without adequate information. Thus, sending a team into space to observe
what happens would be best

Issue- Sending [REDACTED] could risk [REDACTED] is effects are adverse enough

Solution- [REDACTED]

Approved on: 03/27/1982

Expedition: Sagittarius Recruitment

Recruitment completed on 04/20/1982. All four [REDACTED] taking part in Expedition Sagittarius have been accounted for, and contingencies have been put in place should trouble arise. The four civilians are

- [REDACTED]
- [REDACTED]
- [REDACTED]
- [REDACTED]

The method used for selection was determined by first ensuring [REDACTED] [REDACTED] Then, the [REDACTED] of each individual was evaluated to determine who would be most enticed by this offer, which how these final four were decided on.

In the midst of their training, they'll be housed in the [REDACTED] in [REDACTED] Using the [REDACTED] locations is suboptimal due to the covertness of this mission.

**** Addendum as of 5/28**

As of 5/28, one [REDACTED] has been added to the list of [REDACTED] presently taking part in Expedition: Sagittarius. The recruiter sent to [REDACTED] was fascinated by [REDACTED] and advocated [REDACTED] would be interesting to study. [REDACTED] signed off on this on 5/27, and as of today, 5/29, [REDACTED] is residing in the [REDACTED] with the others.

Expedition: Sagittarius Pre-Flight Assessment

- ██████████ (#1) has been chosen as Commander for the expedition due to his congenial nature as well as his ██████████. The rest of the team seem to respect him and listen to his orders and as a result, he has put in charge of this mission, which he accepted with great enthusiasm. He seems to get along best with ██████████ who shares his love of ██████████. He seems to get along least with ██████████ due to his crude way of speaking and some pejorative language used towards the aforementioned ██████████.
- ██████████ (#2) is likely fairing the worst out of the five. She is skittish and nervous, and panics under pressure. As a result, however, this makes her an unpredictable variable which is beneficial for this study. She seems to get along best with ██████████, due to both being women, as well as shared interests in helping other through their career pursuits. She seems to get along least with ██████████ due to his domineering personality and crude behavior.
- ██████████ (#3) is handling herself well, and is the second most competent person aboard the Sagittarius, behind ██████████. She is able to keep ██████████ in check more than most, but this does not diminish the fact that she, too, is getting tired of his remarks. She gets along best with ██████████ due to both being women, as well as shared interests in helping other through their career pursuits. She does not seem to have any conflict outside of her ██████████.
- ██████████ (#4) is adjusting poorly. He is extremely brash, temperamental and stubborn, and constantly uses pejorative language towards ██████████ to the chagrin of his other crewmates. ██████████ is the only one able to reel him in, and even then, only slightly. He seems to think he gets along the best with ██████████ due to their similar backgrounds, but it is abundantly one sided, as ██████████ has displayed hostility towards ██████████ on several occasions, which the latter has brushed off as jokes. He seems to get along least with ██████████ due to ██████████ being ██████████.
- ██████████ is holding his own fairly well amongst his peers. He is competent, highly intelligent and eloquent, things not expected from him. He has formed a close camaraderie with ██████████ who shares his love of flying, and one is hardly seen without the other. He does not seem to get along with ██████████ due to the latter's consistent use of ██████████ towards him.

Expedition: Sagittarius Mission Overview

- On [REDACTED], the five team members boarded the OV Sagittarius and launched into their month long orbit at [REDACTED]. Spirits high.
- [REDACTED] were spent rather idly. [REDACTED] repeatedly picked fights with [REDACTED] who refused to engage with him, only angering the man further.
- On [REDACTED], a physical fight broke out between [REDACTED] and [REDACTED] which was broke up by the other three team members. From this point on, [REDACTED] began to avoid [REDACTED] and [REDACTED] and instead began to terrorize [REDACTED]
- On [REDACTED] the team encountered the cosmic flare
- On [REDACTED] the entire team from ill, and would all remain bedridden until about [REDACTED] on [REDACTED]. During this time, they were prone to fits of nausea, muscle spasms and migraines. It's reported that [REDACTED] suffered the worst symptoms
- From [REDACTED], the team would proceed to eat through their entire remaining ration stash, proceeding to still be hungry afterwards, as if the food no longer provided sustenance.
- On [REDACTED] through unknown means, [REDACTED] would be dispatched via a fatal tear to the carotid artery. The motive and killer are still unclear, and the method is unclear. as the video feed of what happened was distorted electromagnetically.
- On [REDACTED] [REDACTED] would proceed to mortally wound [REDACTED] before being dispatched by [REDACTED]. The motive is still unclear, and the method is unclear. as the video feed of what happened was distorted electromagnetically. [REDACTED] would be dispatched from loss of blood quickly thereafter.
- From [REDACTED] to [REDACTED] [REDACTED] and [REDACTED] would sit in the southeastern pantry
- At [REDACTED] on [REDACTED] [REDACTED] and [REDACTED] would proceed to destroy every surveillance device aboard the OV Sagittarius. Video and audio surveillance were disabled.
- When the OV Sagittarius landed back in [REDACTED], the bodies of [REDACTED], [REDACTED] and [REDACTED] were found aboard the ship. [REDACTED] and [REDACTED] were nowhere to be found, alive or dead. A large amount of blood was found in the southeastern pantry, and it is theorized that [REDACTED] murdered [REDACTED] in a fit of rage and delirium. [REDACTED] is still missing to this day.
